

INNOVATIVE AUTOMATION, INC.

Agile Fin Mill

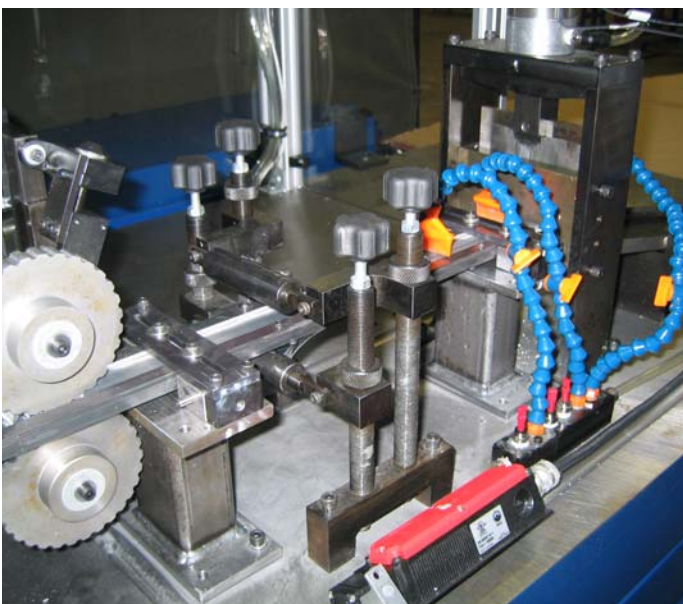

Your manufacturing requirements involve a higher model mix with lower volumes than ever before.

Growth and flexibility in your fin mill production capacity is critical to your ability to expand your business.

The Agile Mill has been developed to address this special growth opportunity.

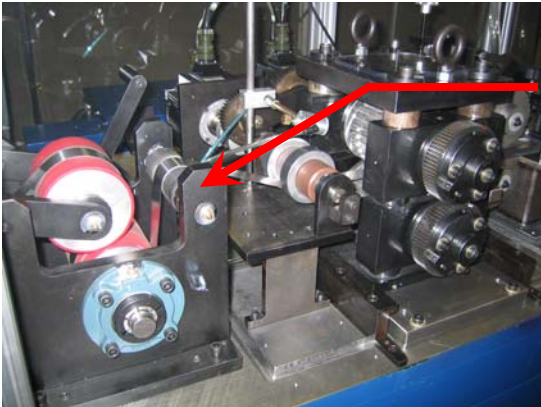

The Agile Fin Mill

Our Agile Fin Mill can grow with your business. Why invest in a high production fin mill when your current requirements are low to mid volume?

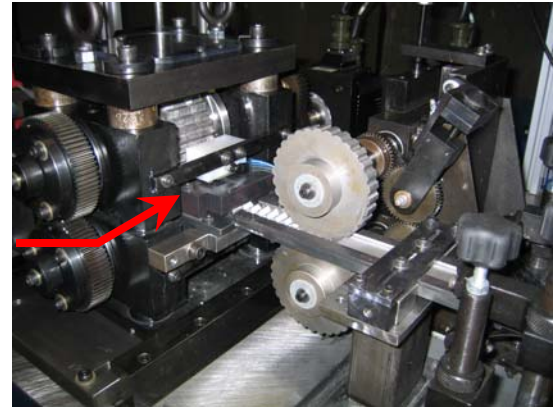

The Agile Fin Mill allows you to invest in the right level of production for your current need. When production increases, we can upgrade your existing mill in the field for additional capacity.

INNOVATIVE AUTOMATION, INC.

Common Assemblies
for both Low and
High Volume

Why replace when
you can upgrade the
existing machine
right on your floor.

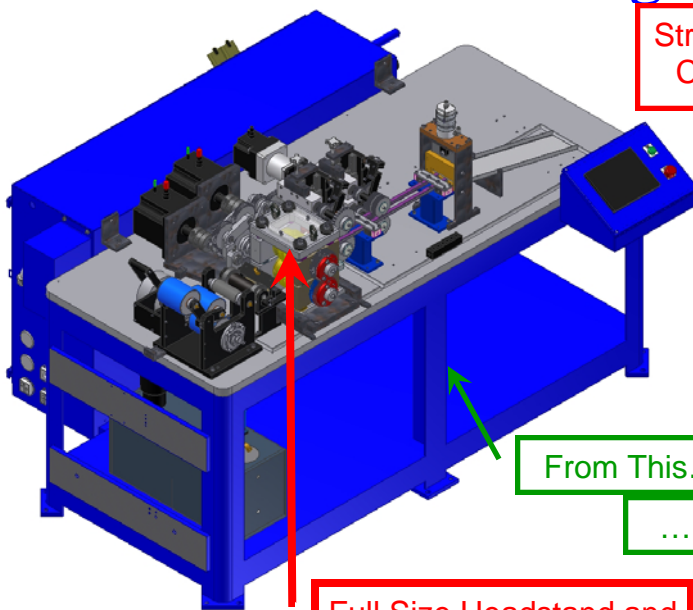

The Agile Fin Mill

Streamline Capital Investment Costs. Invest in Higher Capacity when Production Demands it, Not Before.
